CONTENTS

Volume 35 Number 1 **January 2005**

Making XML document markup international
Y. Yu, J. Lu, J. Mylopoulos, W. Sun, J.-H. Xue and E. H. D'Hollander 1

Selective sweeping
Y. C. Chung, S.-M. Moon, K. Ebcioğlu and D. Sahlin 15

Efficient implementation of multiprocessor scheduling algorithms on a simulation testbed
J. R. Ramos and V. Rego 27

Branch elimination by condition merging
W. C. Kreahling, D. Whalley, M. W. Bailey, X. Yuan, G.-R. Uh and R. van Engelen ... 51

Applications of dynamic proxies in distributed environments
Y. Hassoun, R. Johnson and S. Counsell 75

Volume 35 Number 2 **February 2005**

Minimizing development and maintenance costs in supporting persistently optimized BLAS
R. C. Whaley and A. Petitet 101

A resource management interface for the Java™ platform
G. Czajkowski, S. Hahn, G. Skinner, P. Soper and C. Bryce 123

MultiArray: a C++ library for generic programming with arrays
R. Garcia and A. Lumsdaine 159

Note: Correction to the 1997 tutorial on Reed–Solomon coding
J. S. Plank and Y. Ding 189

Volume 35 Number 3 **March 2005**

Exception handling in the development of dependable component-based systems
C. M. F. Rubira, R. de Lemos, G. R. M. Ferreira and F. Castor Filho 195

Scientific computing with Java and C++: a case study using functional magnetic resonance neuroimages
R. A. Vivanco and N. J. Pizzi 237

Object-oriented design patterns for debugging heterogeneous languages and virtual machines
D. Parson, D. J. Murray and Y. Chen 255

Lightweight monitors for the Java virtual machine
B.-S. Yang, S.-M. Moon and K. Ebcioğlu 281

Sharing of precompiled database statements in J2EE applications
R. Latorre, F. López and A. E. Martínez 301

Volume 35 Number 4 10 April 2005

Perturbing and evaluating numerical programs without recompilation—the wongldiff way
P. R. Eggert and D. S. Parker 313

A negotiation description language
A. Elfatatry and P. Layzell 323

Scalability evaluation of the *Yima* streaming media architecture
R. Zimmermann, C. Shahabi, K. Fu and S.-Y. D. Yao 345

Multiple query optimization in middleware using query teamwork
K. O'Gorman, A. El Abbadi and D. Agrawal 361

Compiler transformations for effectively exploiting a zero overhead loop buffer
G.-R. Uh, Y. Wang, D. Whalley, S. Jinturkar, Y. Paek, V. Cao and C. Burns 393

Volume 35 Number 5 25 April 2005

Classifying product families using platform coverage and variation mechanisms
J. G. Wijnstra 413

LZ trie and dictionary compression
S. Ristov 445

A graphical user-interface and an image processing toolkit for Perl
D. Karasik, A. Berezin, V. Belman and J. Sporring 467

Scheduling parameter sweep applications on global Grids: a deadline and budget constrained cost–time optimization algorithm
R. Buyya, M. Murshed, D. Abramson and S. Venugopal 491

Volume 35 Number 6 **May 2005**

Managing infinite variability in mobile terminal software
A. Maccari and A. Heie 513

JiST: an efficient approach to simulation using virtual machines
R. Barr, Z. J. Haas and R. van Renesse 539

Heuristic compression of an English word list
R. P. Cook 577

Model variables: cleanly supporting abstraction in design by contract
Y. Cheon, G. Leavens, M. Sitaraman and S. Edwards 583

Developing dynamic-reconfigurable communication protocol stacks using Java
Y.-F. Lee and R.-C. Chang 601

Volume 35 Number 7 **June 2005**

Utilizing commodity hardware and software to distribute a real-world application: maximizing reuse while improving performance
M. Davis, R. Smith, B. Dixon, A. Parrish and D. Cordes 621

Arabic GramCheck: a grammar checker for Arabic
K. F. Shaalan 643

Design, implementation, and performance of an automatic configuration service for distributed component systems
F. Kon, J. R. Marques, T. Yamane, R. H. Campbell and M. D. Mickunas 667

Volume 35 Number 8 **10 July 2005**

A taxonomy of variability realization techniques
M. Svahnberg, J. van Gurp and J. Bosch 705

Software Distributed Shared Memory: a VIA-based implementation and comparison of sequential consistency with home-based lazy release consistency
V. Iosevich and A. Schuster 755

Converting command-line applications into binary components
P. M. Maurer 787

Volume 35 Number 9 **25 July 2005**

Special Issue
Grid Security

Editorial
H. Chivers and A. Martin 799

The MyProxy online credential repository
J. Basney, M. Humphrey and V. Welch 801

The case for using Bridge Certificate Authorities for Grid computing
M. Humphrey, J. Basney and J. Jokl 817

The GridSite Web/Grid security system
A. McNab 827

'*R-What?*' Development of a role-based access control policy-writing tool for e-Scientists
S. Brostoff, M. A. Sasse, D. Chadwick, J. Cunningham, U. Mbanaso and S. Otenko ... 835

Towards secure Grid-enabled healthcare
D. J. Power, E. A. Politou, M. A. Slaymaker and A. C. Simpson 857

Applying Security Design Analysis to a service-based system
H. Chivers and M. Fletcher 873

Volume 35 Number 10 **August 2005**

SESAG: an object-oriented application framework for real-time systems
P.-A. Hsiung, T.-Y. Lee, J.-M. Fu and W.-B. See 899

The evaluation of two software watermarking algorithms
G. Myles, C. Collberg, Z. Heidepriem and A. Navabi 923

MobileRMI: upgrading Java Remote Method Invocation towards mobility
M. Avvenuti and A. Vecchio 939

Unifying program slicing and concept assignment for higher-level executable source code extraction
N. E. Gold, M. Harman, D. Binkley and R. M. Hierons 977

Volume 35 Number 11 **September 2005**

Generating high quality printouts from content management systems: a cost-effective approach
M. J. Fernández-Iglesias, L. M. Álvarez-Sabucedo, C. Lojo-Silva and L. E. Anido-Rifón 1007

A large-alphabet-oriented scheme for Chinese and English text compression
H.-Y. Gu 1027

Programming the data path in network processor-based routers
M. E. Kounavis, A. T. Campbell, S. T. Chou and J. Vicente 1041

lmbench: an extensible micro-benchmark suite
C. Staelin 1079

Volume 35 Number 12 October 2005

LZgrep: a Boyer–Moore string matching tool for Ziv–Lempel compressed text
G. Navarro and J. Tarhio 1107

A middleware-transparent approach to developing distributed applications
S. Ghosh, R. B. France, D. M. Simmonds, A. Bare, B. Kamalakar, R. P. Shankar, G. Tandon, P. Vile and S. Yin 1131

Building extensible routers using network processors
N. Shalaby, A. Bavier, Y. Gottlieb, S. Karlin, L. Peterson, X. Qie, T. Spalink and M. Wawrzoniak 1155

SchedSP: a Grid-based application service provider of scheduling solutions
G. Goulas, P. Alefragis and E. Housos 1195

Volume 35 Number 13 10 November 2005

A comparison of BWT approaches to string pattern matching
A. Firth, T. Bell, A. Mukherjee and D. Adjeroh 1217

Validation of dynamic Web pages generated by an embedded scripting language
R. G. Stone 1259

Lessons learned from programmers' experiences with one-way constraints
B. T. Vander Zanden, R. Halterman, B. A. Myers, R. Miller, P. Szekely, D. A. Giuse, D. Kosbie and R. McDaniel 1275

The effect of multiple reference characters on detecting matches in string-searching algorithms
M. M. Mhashi 1299

Volume 35 Number 14 25 November 2005

A comparison between handwritten and automatic generation of C code from SDL using static analysis
M. Becucci, A. Fantechi, M. Giromini and E. Spinicci 1317

Automatic adaptation of mobile applications to different user devices using modular mobile agents
T.-H. Kao and S.-M. Yuan 1349

GLAL: An OpenGL Arabization Library
A. S. Al-Salman and F. Al-Qahtani 1393

Volume 35 Number 15 December 2005

Visual programming support for graph-oriented parallel/distributed processing
F. Chan, J. Cao, A. T. S. Chan and K. Zhang 1409

A software methodology for applied research: eXtreme Researching
O. Chirouze, D. Cleary and G. G. Mitchell 1441

Revisiting dictionary-based compression
P. Skibiński, S. Grabowski and S. Deorowicz 1455

Interpreting computer code in a computer-based learning system for novice programmers
I. Milne and G. Rowe 1477
